- Section A-A**
Recommended throw
- Section B-B**
- 8 If you can not use fan, ensure enough time between layers to cool down material
- 7 If you can not heat the bed use Spray Adhesive
- 6- Do not print LW-PLA parts at the same time with others to avoid stringing in the outer surface.
- 5- Do not use retraction values higher than 3mm for LW-PLA parts because the risk of clogging increases.
- 4- Stringing can not be eliminated for LW-PLA material.
- 3- Center of gravity marking placed under the wing
- 1- Red parameters are mandatory to ensure airplane functionality, assembly or weight target.
